## Second Hand Multiplanters for Sale – Remodelled to Suit

## SECOND HAND NO TILL MULTIPLANTERS REMODELLED TO SUIT REQUIREMENTS

Specialist no till planter with precision seed depth placement.

Multiplanter customers occasionally trade in their machines to upgrade to a bigger or more recent model. Remodelling trade ins enable new customers access to a second hand machine built to their individual specifications. Multiplanter features include the following:

- Depth control the seed tube AND digging tip, preparation of a seed bed and tilth in one pass.
- Moisture seek down to 8-9" (228mm) whilst creating a water harvesting trench for post seed rain.
- Frames remodelled to suit the customer's requirements. This may involve new steel for the frame and pull if it is not worth cutting up the old design.
- End tow, double or single folding wing, linkage, single tyne to 65m plus. All configurations available to new machines are available using second hand stock.
- Row spacings to suit.
- Second hand wheel pillars and wheel forks with either truck or tractor tyres fitted.
- Used hydraulic tyne assemblies of various designs as well as spartips, press wheels and rams. Components fitted may not be identical.
- Spare ram seals, press wheels and spartips will be supplied where useful life is limited.
- Depending on condition, machines may or may not be painted like new. Negotiable.

**Talk to us about your specific Multiplanter requirements**

Optional extras.

- Sweeps or chisel points for chisel ploughing or cultivating (both operations can be depth controlled with the press wheel).
- Fit steering rams to the rear wheels to facilitate GPS autosteer and interrow cultivating.
- Double shoot drop tubes for gas and/or fertiliser.
- Hitch between Multiplanter and Simplicity Seeding cart.
- Press (packer) wheel mudscraper.

Freight ex Multi Farming Systems factory, Banana QLD
